Experience

Freelance Team   Argentina - Remote
Frontend Developer   March 2025 – Current

I work as a front-end developer contributing to the creation of products such as CMS platforms, websites, and control panels for global clients.

- Develop interfaces following Atomic Design principles to ensure consistency and scalability.
- Collaborate closely with the Design team by translating Figma designs into high-quality, responsive code.
- Delivered several CRUD platforms applying SOLID principles to ensure scalability, maintainability, and excellent performance.
- Achieved significant improvements and improvements were achieved and several manual tasks were reduced for customers through these solutions.

Tualo   Mexico - Remote
Fullstack Developer   April 2024 – Feb 2025

As a full-stack developer at Tualo, I contributed to the development of the dashboard responsible for managing the financial data of the clients' companies.

- Led the frontend development, focusing on integrating report automation, implementing interactive data visualizations, and creating the user interface for clients to access their monthly financial reports.
- Developed dynamic charts using Recharts based on uploaded Excel files and integrated OpenAI API for automated report generation, along with building the user dashboard for report access.
- Reduced manual reporting tasks by 80%, leading to a significant improvement in operational efficiency and enhanced data-driven decision-making for clients.

Tu Mejor Amigo   Mexico - Remote
Frontend Developer   Nov 2023 – March 2024

As a Frontend Developer at Tu Mejor Amigo, I was responsible for crafting intuitive and engaging user interfaces.

- I implemented core functionalities for data management using standard API methods and ensured seamless interaction with the application's database.
- Delivered a fluid and responsive user experience, significantly improving data management and application performance.
